Section 1: THE MICE PARADISE OF SOUTHEAST ASIA

Brahminy Kite

Located in the north-west coast of Malaysia on the Andaman Sea, Langkawi is made up of 99 islands in varying shapes and sizes. Officially known as the Jewel of Kedah, Langkawi is known for its myths and legends but above all it is its pristine beaches and its UNESCO Global Geopark that sets it apart from the rest.

One of the rarest natural wonders of the world, the Geoparks is home to amazing flora and fauna and untouched ecosystems that dates back 550 million years ago and is also home to one of the oldest rainforests on the planet.

Of course, it's easy to get to with flights coming in from almost everywhere in Southeast Asia, there's also a myriad of amazing 5-star and 4-star hotels located throughout the island, making it the perfect place for fun green and beach activities, great local and international cuisine and amazing duty-free shopping. These are just some of the many reasons that make Langkawi a true gem when it comes to being a worthy MICE paradise.

COTTAGE BY THE SEA BY FRANGIPANI

Said to be the perfect place for a 'bleisure' destination, the Frangipani Langkawi Resort & Spa offers meeting facilities and a Grand Ballroom with a 180 pax capacity for your next meetings and incentives trip. The Frangipani Langkawi Resort & Spa believe in responsible tourism and have developed approximately 300 Green Practices to effectively reduce, reuse, and recycle.

What's In The Sea Activity

You can show off your strength during this activity, as this activity requires a lot of physical strength. During this activity, a long net will be casted along the sea, and is pulled towards the shore, where we can see a lot of interesting sea creatures being trapped in the net. Then, if we are lucky, our resident eagles sometimes swoop down for a snack from our catch, and it is your chance to feed them!

Organic Farm Tour

You will be guided through our organic farm surrounding the resort, where you can enjoy the beauty of flora and fauna, our green practices and the constructed wetland which is used to treat waste. You can also witness on how we rear the black soldier fly just by feeding them with our waste food, the structure of stingless bees' nest which is different from other bees' honeycombs, also you can feed the rabbits, chickens and ducks. This tour worth RM30 for outsiders, but for hotel guests, you can enjoy this tour for free.

Natural Farm Course

This activity will be conducted at our farm school, covering various subjects such as composting, seed propagation, prepping a plant nursery, making of biochar from charcoal and much more! This class is conducted by Adj. Prof. Anthony Wong who is a naturalist, environmentalist, eco-tourism expert and the director of this resort. RM30 will be charged per person, as we provided resources such as compost and biochar which can be taken back, also refreshments during the class.
